

# ON-PREMISES

VS

# THE CLOUD

## ON-PREMISES

## THE CLOUD

### COST

- Large initial **CapEx**
- Predictable, but might lead to **overprovisioning**

- Pay-as-you-go **OpEx**
- No **hardware** costs

### SCALABILITY

- **Limited**; manual effort to scale
- **Infrastructure** restrictions

- **Instant**; global reach

### SECURITY

- Full **physical** control
- **Customizable** protocols

- Advanced features and **compliance certifications**

### MAINTENANCE

- Manual updates; **potential for downtime**

- Automatic updates; **continuous monitoring**

### ACCESSIBILITY

- Limited to **internal network**; slower VPNs

- Access anywhere; **real-time collaboration tools**
